Dear Alan

Class II Permissive Change application - TCB - Symbol Technologies Inc. FCC id H9PMC9062C

Please find enclosed one set of zipped files on behalf of Symbol Technologies Inc.

The application is for a Class II Permissive Change approval of a Symbol MC9062 Mobile Computer which offers Tri-Band GSM/GPRS 850/1800/1900, 2.4GHz 802.11b Wireless LAN and Bluetooth connectivity when fully configured. A variant of the MC9062 contains the GSM/GPRS module and the RLAN module (FCC id: H9PMC9062C). The reason for this Class II Permissive Change application is that the MC9062 now supports simultaneous transmission of the following radio combinations:

GSM850 & RLAN, GSM 1900 & RLAN.

The two radios have both been previously approved and details of the FCC id's are contained within the BABT 736.

The following documentation is included as directed by **Hilton Carr**:

Attestation statement, Cover letter, authorisation letter, Form 736, EMC reports OR611524-5, OR611524-6 and SAR report WS611524-002 issue 1.

The MC9062 was originally approved by BABT (US000060) and the original TÜV PS job number was 611524.

This application is part of a onestop project. The certification number is **HA611524**. Please do not invoice Symbol directly. The project manager is **Maggie Glasspool**. If there are any questions please contact Maggie in the first instance.

Yours sincerely

Phil Dolling
Compliance Manager
