McLean, VA 22101

Subject: FCC Class II Permissive Change
Reference: FCC ID: H9PMC9090

Sirs,

Motorola requests a Class II Permissive Change to the MC9090 Portable Computer. This permissive change is to add the modularly approved Motorola RFID Reader FCC ID: UZ721121559. The unit has been tested for collocation and no additional frequencies or products were detected that exceed the radiated emissions limits of Part 15.209.

- 1) Motorola MC9090 Portable Computer FCC ID: H9PMC9090.
- 2) The Motorola RFID Reader Module FCC ID: UZ721121559.

In their co-located configuration, there have been no modifications made to these FCC Certified devices.

Radiated emissions with both transmitters operating have been evaluated and found to be compliant with FCC Part 15 requirements. The RF exposure evaluation (MPE) was done with RF transmit power information obtained from the test reports submitted to the FCC for the original certifications.

Respectfully,

A handwritten signature in blue ink, reading 'A.R. Parrish', is located below the 'Respectfully,' text.
