Power output listed is conducted. 5.15-5.25 GHz band operations are restricted to indoor-use only. This transmitter and antenna(s) must not be co-located or operated in conjunction with any other antenna or transmitter not described in this application. SAR compliance was evaluated for a specific handheld/body-worn device as described in this filing. SAR compliance for body-worn operating configurations is limited to the specific belt-clips/holsters/accessories tested for this filing. End-users must be informed of the body-worn operating requirements for satisfying RF exposure compliance. The highest reported body SAR values are: 2.4GHz-band 0.08 W/kg; 5.2GHz-band 0.28 W/kg; 5.8GHz-band 0.17 W/kg. This Permissive Change/Modification is to add DFS to the 5250-5350 band.

ND: This UNII device complies with the Transmit Power Control (TPC) and Dynamic Frequency Selection (DFS) requirements in Section 15.407(h).
