

Federal Communications Commission
Authorization and Evaluation Division
1435 Oakland Mills Road
Columbia, MD 21046

22nd September, 2014

SUBJECT: FCC Application for (H9PRA1202) Part 90 Operation

To the commission:

I, hereby attest that the (hardcoded) factory firmware of this radio is configured to allow only single mode of operation (12.5 KHz or 25 KHz channel bandwidth) for compliance with FCC KDB 579009. Specific versions of the terminal will be released, one will operate at 12.5 kHz and the other at 25 kHz.

This equipment also meets section 90.203(j)(5) for special provision of spectrum efficiency standards.

Respectfully,

A handwritten signature in blue ink that reads "Mark S. Luksich".
