

Description Of Differences

Symbol Technologies is inserting the Novatel Wireless Technologies Inc. FCC Part 22 approved CDPD radio module (FCC ID:NBZNRM-6831) into the Symbol SPT1700 hand held computer terminal. The new product will be known as the SPT1733 Dragon WAN terminal with CDPD radio. Symbol is applying for a new FCC ID Number H9PSPT1733.

The CDPD module itself is being used with no changes at all from the Novatel Wireless Inc. approved unit. The only difference is the cable from module to the antenna and the antenna itself. The antenna is described in another exhibit.
