myQ Pet Portal MYQPP1:  
FCC ID: HBW1533

Letter of Changes

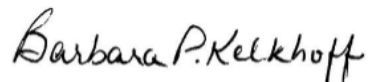

To whom it may concern,

We would like to submit for approval our myQ Pet Portal Model MYQPP1 main printed circuit approval, FCC ID: HBW1533. The main logic board has 4-layer board (FCC ID: HBW1533). The MYQPP1 has two video cameras (FCC ID: HBWSGC1). The two video cameras use 5V USB power from the logic board but they do not use any data lines.

The Astro logic board contains our LMA Realtek Wi-Fi/BLE module (FCC ID: HBW9586) as well Silicon Labs Blue Gecko, new FCC ID HBW2A1799, to send and receive Bluetooth 5.0 messages. The Silicon Labs Blue Gecko operates in the 2.4GHz ISM Spectrum. The Blue Gecko communicates with a Bluetooth Pet Tag accessory that is mounted to a pet's collar.

We would appreciate your prompt attention to the submittal. If there are any questions, please call me at 630-993-6306 or send a fax to 630-516-6863.

Sincerely,

Barbara Kelkhoff  
Regulatory Engineering Manager
