Request for Class 2 Permissive Change

We, Chamberlain Group, Inc., hereby request a Class 2 Permissive Change.

In support of the Class 2 Permissive Change, the following is stated:

The reason for the change was to eliminate multipath interference and poor receiver performance on 315 MHz D code and Wayne Dalton 372.5 MHz Rolling code devices. Adding +/- 100 KHz to the center frequency eliminates this issue we are seeing while still being well within the occupied bandwidth's allowable limits.

I would appreciate your prompt attention to the submittal. If there are any questions, please call me at 630-993-6306 or send a fax to 630-516-6863.

Sincerely,

Barbara P. Kelkhoff
