

Remote Controls

<p>3 Using a safety pin or paper clip, press the program button until the LEDs on the front of the remote control turn on.</p> 	<p>4 Press and release the Learn button on the garage door opener. The Learn LED will light. Within 30 seconds...</p> 	<p>5 Press and release the remote control button you want to use... Check to see if the garage door opener light bulb blinks. If not, wait for the remote control LED to light solid then slowly press and release the remote control button again. Repeat until the light bulb blinks. DO NOT press the button after the light bulb blinks.</p> 
<p>6 To exit programming mode, press any remote control button except the button that was just programmed.</p> 	<p>7 To test, press the programmed button on the remote control... The garage door opener will activate.</p> 	

To Erase the Memory

ERASE ALL REMOTE CONTROLS AND KEYLESS ENTRIES

- 1 Press and hold the learn button on garage door opener until the learn LED goes out (approximately 6 seconds). All remote control and keyless entry codes are now erased. Reprogram any accessory you wish to use.

ERASE ALL DEVICES

- 1 Press and hold the learn button on garage door opener until the learn LED goes out (approximately 6 seconds).
- 2 Immediately press and hold the learn button again until the learn LED goes out. All codes are now erased. Reprogram any accessory you wish to use.

To Open the Door Manually

WARNING

To prevent possible **SERIOUS INJURY** or **DEATH** from a falling garage door:

- If possible, use emergency release handle to disengage trolley **ONLY** when garage door is **CLOSED**. Weak or broken springs or unbalanced door could result in an open door falling rapidly and/or unexpectedly.
- **NEVER** use emergency release handle unless garage doorway is clear of persons and obstructions.
- **NEVER** use handle to pull door open or closed. If rope knot becomes untied, you could fall.

DISCONNECT THE TROLLEY

- 1 The door should be fully closed if possible.
- 2 Pull down on the emergency release handle.

RECONNECT THE TROLLEY

The lockout feature prevents the trolley from reconnecting automatically.

- 1 Pull the emergency release handle down and back (toward the opener). The door can then be raised and lowered manually as often as necessary.
- 2 To disengage the lockout feature, pull the handle straight down. The trolley will reconnect on the next **UP** or **DOWN** operation, either manually or by using the door control or remote control.

Maintenance

EVERY MONTH

- Manually operate door. If it is unbalanced or binding, call a trained door systems technician. Check to be sure door opens and closes fully. Adjust if necessary (refer to Adjustment section). Repeat the safety reverse test. Make any necessary adjustments (refer to Adjustment section).

EVERY YEAR

- Oil door rollers, bearings and hinges. The garage door opener does not require additional lubrication. Do not grease the door tracks.

EVERY TWO TO THREE YEARS

- Use a rag to wipe away the existing grease from the garage door opener rail. Reapply a small layer of white lithium grease to the top and underside of the rail surface where the trolley slides.
- Test the battery and consider replacing the battery to ensure the garage door opener will operate during an electrical power outage.

NOTICETo comply with FCC and/or Industry Canada rules (IC), adjustment or modifications of this receiver and/or transmitter are prohibited, except for changing the code setting or replacing the battery. **THERE ARE NO OTHER USER SERVICEABLE PARTS.**

Tested to Comply with FCC Standards for Home or office use. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

THE REMOTE CONTROL BATTERY

WARNING

To prevent possible **SERIOUS INJURY** or **DEATH**:

- **NEVER** allow small children near batteries.
- If battery is swallowed, immediately notify doctor.

To reduce risk of fire, explosion or chemical burn:

- Replace **ONLY** with 3V2016 coin batteries.
- **DO NOT** recharge, disassemble, heat above 212°F (100°C) or incinerate.

To replace the batteries, remove the two screws and open the remote control housing. Push the battery out of the holder for removal. Insert replacement batteries positive side up (+).

Replace the batteries with only 3V2016 coin cell batteries. Dispose of old batteries properly.
