Section 15.212 Modular Transmitters								
Request for Modular Approval Image: Control of the second secon								
		Requirements	1.1	EUT Conditions	Comply (Y/N)			
		A	[odular ]	Approval Requirements				
1	The radio ele	ements of the modula		CGI is submitting via Limited Modular	Ν			
		nust have their own		Approval (LMA). Additionally, the				
	shielding. Th	he physical crystal an	d	Marvell Module will be tested with the				
	-	citors may be located		host and Class 2 Permissive Change				
		he shielded radio elen	nents.	(C2PC) will be filed with FCC.				
2	The modular	r transmitter must hav	/e	none	Y			
	buffered modulation/data inputs (if such							
	inputs are provided) to ensure that the							
	module will	comply with Part 15						
	requirements	s under conditions of						
	excessive da	ta rates or over-modu	ilation.					
3	The modular	r transmitter must hav	ve its	none	Y			
		supply regulation.						
4		r transmitter must cor		none	Y			
		enna and transmissior						
	• •	irements of Sections						
		nd 15.204(c). The ante						
		be permanently attach						
		nique" antenna coupl						
		ons between the modu						
		including the cable).						
	-	l installation" provisi						
		03 is not applicable t	0					
		can apply to limited	-1- (1-)					
		rovals under paragrap	ph (b)					
5	of this sectio	n. r transmitter must be	tastad		V			
3		one configuration, <i>i.e</i>		none	Y			
		t not be inside anothe						
		g testing for complian						
		requirements. Unless						
		nodule will be battery						
	powered, it must comply with the AC line conducted requirements found in							
		.07. AC or DC power						
		ut/output lines connect						
	-	nust not contain ferri						
		will be marketed with	,					
	-	Section 15.27(a)). The						
		ese lines shall be the l						
	-	tual use or, if that len	-					
	• •	least 10 centimeters	-					
	insure that th	nere is no coupling be	etween					
	the case of th	he module and support	rting					

			I
	equipment. Any accessories, peripherals,		
	or support equipment connected to the		
	module during testing shall be		
	unmodified and commercially available		
	(see Section 15.31(i)).		
6	The modular transmitter must be	none	Y
Ũ	equipped with either a permanently		-
	affixed label or must be capable of		
	electronically displaying its FCC		
	identification number.		
	(A) If using a permanently affixed label, the		
	<i>(A) If using a permanently affixed tabel, the</i> <i>modular transmitter must be labeled with its own</i>		
	FCC identification number, and, if the FCC		
	<i>identification number is not visible when the</i>		
	module is installed inside another device, then		
	the outside of the device into which the module is		
	installed must also display a label referring to		
	the enclosed module. This exterior label can use		
	wording such as the following: "Contains Transmitter Module		
	FCC ID: XYZMODEL1" or "Contains FCC ID:		
	XYZMODEL1." Any similar wording		
	that expresses the same meaning may be used.		
	The Grantee may either provide such a label, an		
	example of which must be included in the		
	application for equipment		
	authorization, or, must provide adequate		
	<i>instructions along with the module which explain</i> <i>this requirement. In the latter case, a copy of</i>		
	these instructions must be included in the		
	application for equipment authorization.		
	(B) If the modular transmitter uses an electronic		
	display of the FCC identification number, the		
	information must be readily accessible and		
	visible on the modular transmitter or on the		
	device in which it is installed. If the module is installed inside another device, then the outside		
	of the device into which the module is installed		
	must display a label referring to the enclosed		
	module. This exterior label can use wording such		
	as the following:		
	"Contains FCC certified transmitter module(s)."		
	Any similar wording that expresses the same		
	meaning may be used. The user manual must		
	include instructions on how to access the electronic display. A copy of these instructions		
	must be included in the application for		
	equipment authorization.		
7	The modular transmitter must comply	none	Y
,	with any specific rules or operating		-
	requirements that		
	ordinarily apply to a complete		
	transmitter and the manufacturer must		
	provide adequate instructions along with		
	the module to explain any such		
	requirements. A copy of these		
	instructions must be included in the		
	application for equipment authorization.		

8	The modular transmitter must comply	none	Y		
	with any applicable RF exposure				
	requirements in its final configuration.				
A <b>limited modular approval</b> may be granted for single or split modular transmitters that do not comply with					
all of the above requirements, <i>e.g.</i> , shielding, minimum signaling amplitude, buffered modulation/data inputs, or					
power supply regulation, if the manufacturer can demonstrate by alternative means in the application for					
equipment authorization that the modular transmitter meets all the applicable Part 15 requirements under the					
operating conditions in which the transmitter will be used. Limited modular approval also may be granted in					
those instances where compliance with RF exposure rules is demonstrated only for particular product					
configurations. The applicant for certification must state how control of the end product into which the module					
will be installed will be maintained such that full compliance of the end product is always ensured.
