### Declaration of Similarity

This is to certify that Inovonics products EN1941, EN1941-3600, EN1941-XHR and EN1941XS are all built on the same PC board and operate with the same core firmware. The only differences lie in binary data versus serial data, check in times and headers. The EN1941s are one-way binary data RF modules. The EN1941XS is a one-way serial data RF module.

A handwritten signature in cursive script, appearing to read 'Floyd Nishi', written over a horizontal line.

Floyd Nishi  
Director of Manufacturing Engineering
