

# IM21-PRT RFID Module

## Antenna Details

### Annexure - VI

|                  |                  |                |
|------------------|------------------|----------------|
| Model : IM21-PRT | FCC ID: HD5-IM21 | IC: 1693B-IM21 |
|------------------|------------------|----------------|

## Annexure - VI : RFID Antenna and Coupler Details

Following are the list of RFID Antenna's and Couplers used along with IM21 RFID Module.

| Sl. No | Coupler            | Design                               | Make                   | Model                         | Max Gain (dBi) |
|--------|--------------------|--------------------------------------|------------------------|-------------------------------|----------------|
| 1      | PCB – RFID Coupler | Microstrip line fed aperture coupler | Laird Technologies*    | MAF95123-1 / 234-079-0600     | -19.3          |
|        |                    | Microstrip line fed aperture coupler | Laird Technologies*    | 1-971140-001                  | -24.2          |
| 2      |                    | Microstrip line fed aperture coupler | Unictron Technologies* | H2B1JH1A1H0200 / 710000068100 | -23.0          |
| 3      |                    | Loop aperture coupler                | Honeywell              | LUPUS14V2                     | -14.0          |
| 4      |                    | stripline coupler                    | Honeywell              | LUPUS32                       | -27.2          |
| 5      |                    | Loop aperture coupler                | Honeywell              | CORVUS10                      | -20.5          |

\*Custom design for Honeywell products only

The IM21-PRT RFID Module and Antennas are having Unique antenna Coupling Mechanism.

## Annexure - V : RFID Couplers High Level Details

| Model                                                                                                                                                                   | Gain (dBi) Plot                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                 |            |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |     |
