

Hello,

This is in response to a finding sent by FCC on 2/2/18.

Please see attached recent versions of the files concerned. These should be sufficient to address FCC's original finding concerning the 21dBm limit above 30 degrees required by 15.407(1)(i).

We are submitting revisions of the following exhibits:

Test Report

Test Setup Photo

User's Manual

We are also submitting an Operational Description - Antenna Specification exhibit.

Please advise whether and when we as TCB should open an Audit Request to upload new versions of these files.

Thank you.
