RE: FCC ID: HDCTRC4202L1_ATCB002470
Attention: Gregory M. Snyder

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the Block Diagram is not listed on the request for confidentiality. This means that it will be for public view. If this exhibit is desired to be held confidential, please add it to the request for confidentiality.
2. FYI – no action needed. Please try to provide clearer and more focused internal photo exhibits.
3. FYI – please note that on page 2 of the MPE report you refer to section 1.307 of the FCC rules. Please note that the reference should be 1.1307.
4. Please note that while you refer to RSS210 in the report, you do not provide the relevant paragraphs from RSS210 that cross reference testing done. Please provide the RSS210 cross references needed.
5. Please note that Industry Canada requires that a plot of the 99% Occupied Bandwidth be provided in the report. Please note that while a plot of the 6dB bandwidth for FCC is provided, I cannot find a plot in the report that shows a properly measured 99% bandwidth plot as defined and described in RSS210. Please provide this plot/data.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
