

The TRACER 2631 / 3XXX system is functionally identical to the already approved wireless router / rackmount RFC configuration. The 2631 baseband processor provides a single T1 interface as well as an independent 10BaseT interface with integral IP and IPX bridging and routing functionality. The 2631 baseband processor is designed to interface to any of ADTRAN's RF converter configurations, including 100 mW 2.4 GHz rack mount, 100 mW 2.4 GHz mast mount, 1 W 2.4 GHz rack mount, 100 mW 5.8 GHz rack mount, and 100 mW 5.8 GHz mast mount options.
