Subject: Application for Class II Permissive Change, FCC ID: HDCWLAN193XF1, IC ID: 2250A-WLAN193XF1

Dear Application Examiner,

The purpose of this filing is to apply for a Class II permissive change to the ADTRAN 2.4/5GHz 3x3 MIMO WLAN module, Model BSAP-1930/BSAP-1935. The change is required to add a Dual Band patch antenna to the list of approved antennas:

- 1) Terrawave P/N: M6013070P30006I (2.4/5 GHz 13/7 dBi High Density MIMO Patch Array Antenna)

The BSAP-1930 was tested in a host (BSAP-2035) in conjunction with a second module that provided the 5GHz 3x3 MIMO connections to the dual band patch antenna. A second C2PC is being completed in conjunction for this module (Model: PCE4551AH-BS, FCC ID: HDCWLAN203XF1, IC ID: 2250A-WLAN203XF1). In this configuration, only the 2.4GHz functionality of the BSAP-1930 module is available

The maximum output power is limited to compliant levels and not configurable by the end-user. There is a professional installation attestation letter attached to the original filing.

Your efforts in reviewing this application are greatly appreciated. Please contact me if there are questions or additional information needed concerning this request.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Jeremy Pickens'.
