

FCC ID: HDT16011-27

Circuit Description

The 27.141MHz LCR oscillator drives the base of Q1 the final/buffer amplifier. The modulation provided by U2. The output of Q2 has the matching network consisting of L1 and C8 that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

Antenna, Ground and Power Source

The antenna consists of a 41cm long metal antenna. There is no external ground connection. The ground is only that of the printed circuit board. Electric current is supplied by a 9 Volt ("6F22" size battery x 1) primary battery
