

RIM MOBITEX WIRELESS CARD

FCC RF EXPOSURE INFORMATION

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this device complies with the FCC guidelines and these international standards.

Use only the supplied or an approved antenna. See below for detail. Unauthorised antennas, modifications, or attachments could impair call quality, damage the phone, and will result in violation of FCC regulations and **will void the FCC ID.**

Modifications not approved by the manufacturer or use of any non-authorized wireless card may result in violation of FCC regulations and may void the Users authority to operate the equipment.

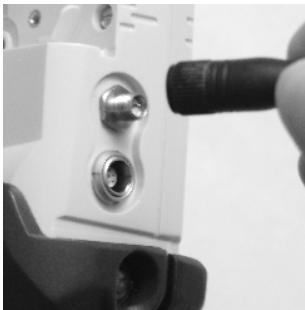

This device contains a transmitter, **RIM MOBITEX 902M**, that has been tested and certified for FCC RF exposure compliance. This device has been tested and complies with FCC RF exposure compliance requirements.

This product **can only be used in Canada and USA.** This device has not been tested to comply with any other international standards bodies

For more information about RF exposure, please visit the FCC web site at www.fcc.gov

For more information about the product certification, please contact support@daptech.com

Installation of the antenna

Install the antenna by screwing it on the antenna connector.

Do not over-tight

Replacement of the antenna

Use only the supplied or an approved antenna(s). Unauthorised antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations.

Be sure to replace the antenna with the appropriate one.
