RE: DAP Technologies

FCC ID: HDWAEA307

I have a few comments on this Application.

- 1.) The new Block Edge requirements do not appear to meet the expectations of the Commission. Please view the attached guidance issued directly by the OET Laboratory in Columbia, MD.
- 2.) Excuse my confusion, but will this equipment be equipped with both the Sierra 555 and 750 radio modems? Or is one an option? I have in my possession information supplied by Sierra on both wireless products.
- 3.) Please provide written rationale for performing SAR test on only one channel in the 800MHz AMPS band and one channel in the 1900 MHz PCS band.

William H. Graff
President and Examining Engineer
