RE: Accton Technology Corporation

FCC ID: HED3CRWE52196

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Page 90 & 93 of the users manual states the device may use shielded or unshielded Ethernet cables. However pages 114 & 117 state that shielded cables must be used. Please explain if the device was tested with shielded Ethernet as it could not be confirmed in the test report. If shielded cables were not necessary, please remove the references in the users manual on pages 114 & 117, however if they were, please modify page 90 & 93 as appropriate.
- 2) The RF exposure statements on pages 117 & 118 need to have the prohibition of co-location added to them.

Timothy R. Johnson
Examining Engineer
