This image shows a close-up of the green printed circuit board (PCB) of the LED strip. Several components are visible and labeled with white text: three LEDs (LED2, LED3, LED4) are mounted in a row; a resistor (R15) and a capacitor (C13) are located below LED3; another resistor (R214) and capacitor (C222) are located below LED4; and a resistor (R213) is located to the right of LED4. The PCB features intricate copper traces and a series of mounting holes along the bottom edge.
