Subject: Accton Technology Corporation, FCC ID: HEDSMC2552WG2,
Assessment NO.: AN06T6062, Notice#1

Question #1: The test report includes test data in 11g turbo mode (datarate 108Mbps). But the operational description indicates the throughput is up to 54Mbps, "Data rate upto 54Mbps" is also repeated stated throughout the user manual except Appendix C. Page 6-93 indicates: Turbo see page 7-96, but page 7-96 does not exist. Please update the technical documents to make it consistent.

Ans: The OpDes had been revised as attachment.

Question #2: The device comes with two dipole antenna. Please update operational description to specify the purpose to use two antennas, for diversity or multi-antennas working simultaneously.

Ans: The OpDes had been revised as attachment, same as Q1.

Question #3: The schematics show an 802.11a radio (AR5112). The 11a radio can be found on internal photos. Please confirm whether the device has the capability to operate at 802.11a mode. If so, please submit additional test data in 802.11a mode. Otherwise, please provide mechanism how 11a is disabled.

Ans: Client provide a DoC form that delcation the 802.11a will be disable.

Best Regards,
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
