RE: Accton Technology Corporation

FCC ID: HEDWN3201CACC

I have a few comments on this Application.

- 1.) No sample label was included in this Application. Please submit.
- 2.) The Block Diagram is not of sufficient detail as defined under 2.1031(b)(5). Please submit revised Block Diagram
- 3.) The Manual on pp. 20 of 21 does not include any prohibitions on co-location. Please revise manual.
- 4.) Both the Manual and Product Description define the antenna connector as a reverse threaded SMA. However, this is not apparent from close up examination of the photographs. Please submit either a line drawing or more detailed photograph of the connector.
- 5.) Two antennas are indicated in the Manual, but only one is defined in the RF Exposure report. Please provide specifications including gain on each antenna. If needed, update the RF Exposure evaluation.

William H. Graff  
President and Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
