RE: FCC ID: HFS-APOLLO\_ATCB004247  
Attention: Daniel Lee

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the erp values for the WCDMA modulation channels in the 1900 MHz band are shown the same as the channels for GSM. Please note that this is not possible. Please retest the WCDMA power levels using correct WCDMA channels and provide appropriate data.
2. Please note that the radiated spurious emissions in section 4.6 of the report states that antenna substitution was used, however, there is no data on the gain of the substitution antenna or the power into the dipole. Only the end results are reported. Please correct and provide all necessary data for antenna substitution measurements.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
