RE: Quanta Computer Inc.
FCC ID: HFSA8BCM94306MP

I have a few comments on the above referenced Application.

- 1) The limit for 7236 MHz on page 28 of the EMC report should be listed as 20 dB below the fundamental to be consistent with the rest of the report. Please correct.
- 2) The delta for the OFDM high bandedge in the EMC Report appears to be mis-calculated. Please correct.
- 3) In the SAR report, the verification dipole and probe appear out of calibration. Additionally the serial number of the probe used does not match the calibration information provided.

Timothy R. Johnson
Examining Engineer
