

Note: This Laptop Model contains only a WLAN and Bluetooth device. The metal frame surrounding the lid is designed to support a WWAN device that is not included in this Model.

Applicant statement follows:

We uploaded both FCC and IC applications for you; could you please review it and give us your comments if there's any questions?

As usual, we would like to inform that the WWAN antenna was embedded in the host device which was remarked the locations in the report to prevent confusion.

The antenna cannot be removed and operated if this notebook only supports WLAN function. Once WLAN module approved, WWAN application will follow up and estimate both antennas.

Thanks.
