Dear Sir/Madame,

The filing of this C2PC project, FCC ID:HLZ-AR5B97, only supports 802.11 b/g/n (Frequency range 802.11b/g/n 20M: 2412~2462MHz, 802.11 n_40M: 2422~2452MHz) and will not support WLAN 5GHz and Cell 3G TXs.

However, we commonly use the same user guide for product bundled WLAN with both 2.4GHz and 5GHz. That's mainly for lower additional raw materials, operation management, and unnecessary stock lost to save the earth ☺.

In the user manual we include UNII warning statement due to this notebook platform might also use other modules that supports 802.11 a/b/g/n in a separate project in the future.

Certification information :

Brand Name: Acer

WLAN IC : 1754F-AR5B97

WLAN FCC ID : HLZ-AR5B97

Model No.: AR5B97

Host Model No.: P4VC0

Sincerely,

RU Jan / Functional Manager
