

CORRESPONDENCE SUMMARY:

Question:

Based upon our review of this application we have the following questions:

ShortTerm-CONF_BCM94312HMG_RFExpPho.pdf. Page3 shows a Notebook with a WWAN in the left top cover. Please correct.

ShortTerm-CONF_BCM94312HMG_Photos.pdf. Page 15 of 24 shows a WWAN in the upper left hand corner. Please correct.

Answer:

Response: This is WLAN modular approval filling; we marked the location for WWAN antenna in order to get rid of confusing. The antenna is embedded in the host notebook and cannot be taken away. Once WLAN module approved, WWAN application will follow up. This antenna is actually not removable and cannot be operated if this notebook only supports WLAN function, which is not allowed to operate.
