

Correspondence Summary

October 9, 2009

SUBJECT: Acer Incorporated - FCC ID: HLZ-BRCM1030

TCB question:

1. *Photos: p14/23 shows a WWAN device. Please revise or explain.*
2. *RF exposure photos: p3/4 shows a WWAN device. Please revise or explain.*

Applicant's Answer:

Responses: For question 1 and 2, this is WLAN modular approval filling; we marked the location for WWAN antenna in order to get rid of confusing.

The antenna is embedded in the host notebook and cannot be taken away. Once WLAN module approved, WWAN application will follow up.

This antenna is actually not removable and cannot be operated if this notebook only supports WLAN function, which is not allowed to operate.
