Columbia, MD. 21046

Attn: Equipment Authorization Branch  
Re: Declaration on Operating Frequency Band

To Whom It May Concern:

The Acer Notebook PC Aspire 1710 series (Brand: acer, Model: DT3) built in a 802.11b+g WLAN module inside (Brand: Wistron NeWeb, Model: RM8) should use the frequency band between 2412MHz to 2462MHz for the communication in US.

Thank you for your attention to this matter.
