Federal Communications Commission  
Authorization and Evaluation Division

RE : Declaration

To whom it may concern,  
P300 is a WLAN/BT combination antenna with FCC ID: HLZDMP300EU. This WLAN/BT co-existence mechanism is to ensure that the WLAN and BT transmitters would not simultaneously operate. Therefore, WLAN and BT antenna in P300 should not be considered to be able to transmit simultaneously. Though the users can use WLAN and BT simultaneously, but the real situation is that WLAN and BT are used by time sharing and no overlap transmission.

Should you have any questions, please have my best attention.

Sincerely,

---

Harriot S.L. Lee
