Attestation Letter

We, Acer Incorporated, attest that there are no known events that would cause the sensor to not trigger at the specified triggering distance of our product, Wireless Tablet PC, Model: W511/W511P/WT3. Furthermore, the host software and the network could not override the proximity sensor's command to reduce the transmit power when the power reduction command is in effect.

Should you have any questions or comments regarding this matter, please have my best attention.

Sincerely yours,

Contact Person: RU Jan
