November 1, 2021

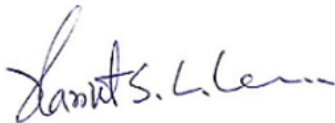

This device, FCC ID: HLZPCONNECTD5, support LTE Band 2/4/7 and 5G n77/n78 via integrating the WWAN module ZMOFM350GL (Date of Grant: 04/09/2021)

There is no hardware and software design change made on the module, except for disabling some frequency bands. The supported bands are listed below, and the integration details are illustrated in the operational description. The conducted test data in the original modular test reports are deemed representative, pursuant to KDB 996369 D02, the modular reports are submitted as exhibits along with the additional spot check conducted power data to demonstrate compliance.

Supported band	Original modular Report Exhibit to be referenced
LTE BAND 2, 4	FG051802B
LTE BAND 7	FG051802C
5G Band n77, n78	FG051802I

The new test reports show additional evidence for EIRP and radiated results to demonstrate full compliance of host itself.

Sincerely,

Harriot Lee
