August 25, 2003

Dear Application Examiner:

Please note that the SAR Report issued by Compliance Certification Services, Report # 03U2103-1, dated July 09, 2003, incorrectly lists the FCC ID number for the 802MIG2 as FCC ID: HN2802MIG2. Since the date when the SAR report was issued, Intermecc has changed their FCC ID number scheme. Now the correct number is FCC ID: HN2CK30MIG2.

The applicant attests that the unit tested and documented in CCS Report # 03U2103-1 is the same as the unit described in this filing for certification.

Also, when comparing the SAR Report with the User Manual, there is a slight difference between the numbers used to identify the body-worn accessories. The User Manual lists the accessory Model Number. The SAR report lists the Part Number. The part number gives additional characters used sourcing the accessory from within Intermecc's internal ordering system. The model number allows end-users to identify the component when ordering from Intermecc.

Best regards,

A handwritten signature in blue ink, appearing to read "G. Kiemel". The signature is stylized and written in a cursive-like font.

Greg Kiemel, Director of Engineering
