

March 20, 2000

Dear Mr. Chen,

Since Mr. Dichoso requested I place our response into the RF Expo folder, I am also including this letter. I would like to apologize for the misunderstanding in our recent response. Due to a misinterpretation on our part, we placed the wrong distances in our Manuals. I have corrected those and revised the warnings for installers and users with the 20 cm warning. As I explained before, this product is intended for industrial controlled environment installations. It will only be installed by trained Intermec personnel. Our training guidelines include RF safety issues such as keeping the installers and users away from the antenna. Please let me know, if you have any further questions regarding this product.

Sincerely,

Kursat Eroglu, MSEE
Sr. EMC Engineer
