

Medical Imaging *RDE*

From: [Jan Vercammen \(6233\) – MI/TSP-HW/Electronics](#)

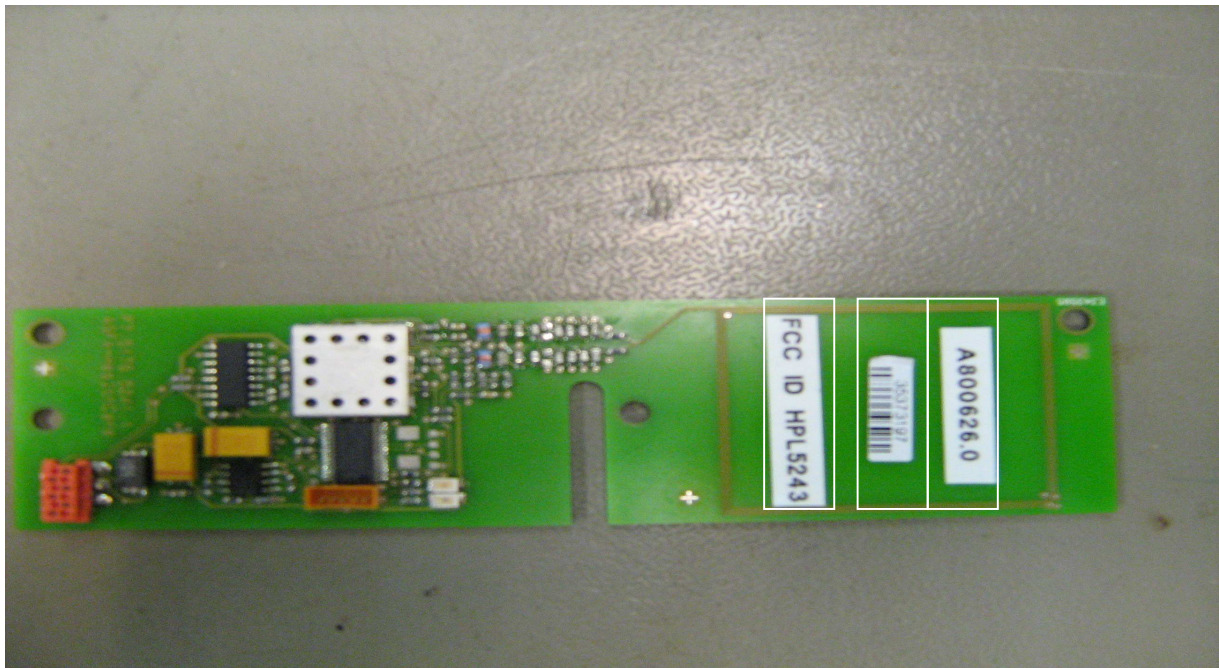

Date: May 18, 2011

Concerning: Location of FCC ID and part number (FCC ID: HPL5243)

The RF tag reader is a small printed circuit board. It has three labels:

1. Part number label A800626.0, where the last number is a revision code index
2. Board Assembly Serial Number, the exact format of the serial number is dependent on the printed circuit board assembly manufacturer. A barcode representation is also possible. The example shown in the photograph will differ from production parts.
3. FCC ID identification: the text is FCC ID: HPL5243

Note: The exact font and size of the characters of all three will differ from the photograph taken. The FCC ID can be read without the use of external devices.
