

Cover letter for this FCC application

Type of device: printer

FCC ID: HPL5365

Model number: Drystar 5300/xxx

Clarification of the authorization approach for the device within submission:

This product is intended to operate in a professional environment (non residential installation). The RF tag integrated in this printer is a tag operating at 13.56MHz and has separately been filed for OEM integration in the FCC database under FCC ID: P5ROEM410V12. The integrated RF tag has been re-tested on critical parameters and re-authorized under the FCC ID: HPL5365 filed in this application. Therefore, the initial test report and applicable exhibits from P5ROEM410V12 have been submitted, together with the additional test report and applicable exhibits of the printer device (as a whole).

The “digital” portion of the printer device has been authorized under CFR 47 Part 15 Subpart B by means of Verification procedure by the applicant.
