料號: MA6B126801-Y
 尺寸: 152.4*190.5mm
 材質: 300g單銅粉,4C

Operation & Installation Guide

Installing the Batteries
 The battery compartment is located on the bottom of the mouse. Remove the battery door and place 2 AAA batteries into the battery compartment.
Note the polarity (+/-) of the batteries to ensure the correct placement. The mouse comes equipped with a helpful tab inside the battery compartment.

Using the SmartStore™ Nano Receiver
 The nano receiver is located next to the battery compartment in the bottom of the mouse. To remove, fit your thumb nail under the lip of the nano receiver and pull up. To store, simply push the receiver back into its dedicated slot.

Connecting your Mouse
 Remove the nano receiver from the mouse and connect it to an available USB port on your computer or USB hub. Make sure the batteries are inserted correctly in the mouse. Turn the mouse on by moving the on/off switch to the on position.

Equipped with BlueScan Technology
 Allows for use of this mouse on surfaces that most traditional optical mice can't track on. The BlueScan™ Technology is perfect for the traveler without a conventional desk and mouse pad.
*Note not intended for use on newly cleaned glass surfaces or mirrored surfaces.

FCC INFORMATION

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 1. This device may not cause harmful interference, and 2. This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.
