To Whom It May Concern:

Honeywell is creating a new wireless thermostat kit for line-voltage baseboard heaters called EConnect. The kit contains: a thermostat, an antenna module, and a relay module. Additional Honeywell Redlink accessories can be added to the system, but the basic kit being sold contains the main 3 components shown below.

The table below describes the various device/model numbers associated with the kit. Because of branding between the Honeywell and Aube names, two kits have been created for their respective markets. The core electric device remains the same between the two models.

		Device/ Model Number	FCC ID	IC
Thermostat	Honeywell	50052667-001	HS9-50052667	573R-50052667
	<u>Aube</u>	50052667-002	HS9-50052667	573R-50052667
Antenna	Honeywell	50052669-001	HS9-50052669	573R-50052669
	<u>Aube</u>	50052669-002	HS9-50052669	573R-50052669
Relay Module	Brand Neutral	50052668-001	No Radio	No Radio

Sincerely,

Dave Mulhouse
