Attention: Authorization and Evaluation Division

Subject: RFI related modifications incorporated

into unit COLOR MONITOR with - FCC ID: HSUTRLS-111

Date: Aug. 24, 2000

Dear Sirs:

This letter serves as our declaration that all modifications listed below were implemented in the sample submitted for testing. We further declare that the same modifications will be implemented into all production units to enhance compliance of the units to FCC limits.

The modifications include the following:

- 1. Added a metal cover on the rear side of CRT board and it was connected to chassis by twelve ground wires. (see photo 5 & 6)
- 2. Added two ferrite cores on the focus wire, one with turn. (see photo 7)
- 3. Added a ferrite core on the G2 wire with two turns. (see photo 7)
- 4. Added an AC line filter on the AC power socket. (see photo 18)
- 5. Added two capacitors, one transistor, three jump wires on the solder side of mainboard for electrical improvement only and not for EMI. (see photo 20)
- 6. Added a resistor on the solder side of video board. (see photo 26)
- 7. Added a ferrite core on the video cable with BNC connector outside the monitor. (see photo 27)
- 8. Added two ferrite cores on the video cable with D-Sub connector outside the monitor. (see photo 28)

If you have any further questions or comments regarding the above, please don't hesitate to contact Mr. Mike Su of ADT Lab. at fax No.:886-2-2602-2943 or E-mail: mike@mail.adt.com.tw

Sincerely yours,

J. Y. Jan / R&D Duty Manager
