Ms. Sharon Hoffman  
Timco Engineering

Dear Ms. Hoffman,

I am sending you this letter at the request of Syn-tech Systems regarding a Class II permissive change to allow the use of additional antennas with products based on Cirronet's WIT2410M radio module.

Cirronet grants permission for Syn-tech Systems and Timco Engineering to use Cirronet's original FCC test data and FCC ID, HSW-2410M, for the purpose of submitting a Class II permissive change to allow the use of additional antennas with WIT2410M-based products.

Sincerely,

Tim Cutler  
Vice President
