5375 Oakbrook Parkway
Norcross, Georgia 30093
USA

Tel: 678 684 2000
Fax: 678 684 2001

Date: 11-17-03
Reference: FCC PCII

To Whom It May Concern:

The ac conducted test performed on the WIT2410M (US Tech Report 03-0355) is shown in a plastic box in the lab photo.

This plastic box is the same used in the original submission for HSW-WIT2410M (US Tech Report 99-317) the only difference was that the module in the more recent test, was placed inside the box and not outside with a cable as in the original submission.

There were no additions nor changes and the module is considered electronically equivalent to the original certified unit.

The new ac conducted test was only to test the module down to 150 KHz. and up to 30 MHz. as required by the FCC
