

## Declaration of Compliance

### ATTESTATION:

I attest:

- a) That Cirronet intends to sell only the tested antenna types and those outlined in the integration guide provided with this permissive change module, detailed in Section 7.3-, which lists the antennas that may be directly purchased from RFM to be used with this product. This list is seen to include the antennas currently tested for this Permissive Change: 14dB Corner, 12dB Omni and 12dB Patch. This list also includes other antennas that may be directly purchased from Cirronet that are in the aforementioned categories which have equal to or less gain than the antenna measured for this effort.
- b) No intentional increase in power is meant to occur with the replacement Power Amplifier and its use does not degrade the performance of the radio.
- c) The integration guide provided is for use with this version of the unit only.

### Signature:

A handwritten signature in black ink, appearing to read 'Mark E. Tucker', is written over a blank space.

### Date:

October 8<sup>th</sup> 2010

### NAME (Please print or type):

Mark E. Tucker
