Re: FCC ID: HSW-934

To Whom It May Concern:

The following application is submitted on behalf of our client, Cirronet Corporation, for evaluation of their model WIT-934 for certification under FCC Part 15.247.

The WIT-934 is a Spread-Spectrum Frequency Hopping RF Module operating in the 902-928 MHz band. This report is for a class II permissive change to include a new antenna for portable operating configurations.

Only radiated emissions were performed to demonstrate that the new antenna complies with the aforementioned rules and were found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
