

CIRRONET™

An RF Monolithics Company

REF: WIT934M Module Certification

To Whom It May Concern:

We are asking for a modification to the WIT934 FCC Grant FCC ID: HSW-934.

Up until this module all our FCC Grants have been Mobile Grants where duty cycle was not an issue if the EIRP was below the spectral density limits.

With this Grant we mistakenly left out an Access Point application which has a higher duty cycle and therefore requires Mobile grant notes and MPE calculations for this use.

The attached documents, an Integrators Guide and Portable and Mobile Calculations has changes to correct the issues.

Thank you,

Al Patrick
