Re: FCC ID: HSW-CCT24

To Whom It May Concern:

The following application is submitted on behalf of our client, Murata Electronics North America, for evaluation of their model CCT24 for class II permissive change certification under FCC Part 15.247.

The CCT24 is a 2.4 GHz frequency hopping transceiver designed for us in industrial and commercial monitoring and control markets. The CCT24 employs a dual carrier transmission within the frequency band 2409.55 - 2479.85 MHz.

The purpose of this class II permissive change is to include the body worn host devices as identified in the table below. Compliance with RF Exposure is documented in this filing.
