Applications Examiner

**RE: FCC PART 15 and IC PERMISSIVE CHANGE for Cirronet Corporation,
FCC ID: HSW-DNT24, IC: 4492A-DNT24**

Dear Application Examiner:

It has come to our attention that we erroneously applied for LIMITED Modular Approval for the above referenced FCC ID and that the product is actually eligible for FULL Modular Approval.

In the original application, we missed the power regulator that was shown on the schematics and, since the Block Diagram did not show the power regulator, we made the assumption that the product was eligible only for LIMITED modular approval.

Cirronet Corporation recently noticed that the information on the Grant and in the originally submitted modular approval letter was not accurate and has requested that the grant be corrected to reflect FULL modular approval. To this end, I've attached a corrected Modular approval letter (items 3, 4, and 5 have been corrected), a corrected block diagram (with the power regulator in evidence), and a copy of the originally submitted schematic diagram (showing the power regulator).

The original test data continues to apply to this Class II permissive change/ reassessment application since no physical changes were made to the modular transmitter.

Please let us know if you need any other information in order to make a grant correction with the FCC.

Best Regards,

A handwritten signature in cursive script, appearing to read 'Sandi McEnery', written in dark ink.

Sandi McEnery
Agent for CIRRONET CORP.
