PART 15 UNLICENSED MODULAR TRANSMITTER APPROVAL

Cirronet DNT500FP Module

Per FCC DA 00-1407, Cirronet's DNT modules are compliance with the requirements listed below.

1. The modular transmitter must have its own RF shielding.

Cirronet's DNT Module has shielding as required.

2. The modular transmitter must have buffered modulation/data inputs.

Cirronet's DNT Module has buffered modulation and data inputs.

3. The modular transmitter must have its own power supply regulation.

Cirronet's DNT Module has its own internal regulator.

4. The modular transmitter must comply with the antenna requirements of Section 15.203 and 15.204(c).

Cirronet's DNT Module has an integrated antenna.

5. The modular transmitter must be tested in a stand-alone configuration, i.e., the module must not be inside another device during testing.

Cirronet's DNT Module was tested in a stand-alone configuration using a support PC board.

6. The modular transmitter must be labeled with its own FCC ID number.

Cirronet's DNT Module is design as an OEM module. The DNT Module will be labeled and instructions given to the OEM customer for FCC label requirements.

7. The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter.

Cirronet's DNT Module meets the specific requirements of FCC Part 15.247.

8. The modular transmitter must comply with any applicable RF exposure requirements.

Cirronet's DNT Module meets the specific requirements for the FCC MPE RF Exposure. Applicable warnings for RF Exposure are included in the Integration Guide for the DNT module.
