PART 15 UNLICENSED MODULAR TRANSMITTER APPROVAL

Cirronet HSW-DNT900 Module

Per FCC DA 00-1407, Cirronet's DNT modules are compliance with the requirements listed below.

1. The modular transmitter must have its own RF shielding.

Cirronet's HSW-DNT900 Module has shielding as required.

2. The modular transmitter must have buffered modulation/data inputs.

Cirronet's HSW-DNT900 Module has buffered modulation and data inputs.

3. The modular transmitter must have its own power supply regulation.

Cirronet's HSW-DNT900 Module has its own internal regulator.

4. The modular transmitter must comply with the antenna requirements of Section 15.203 and 15.204(c).

Cirronet's HSW-DNT900 Module output is through a U.FL coaxial connector and is unique in design.

5. The modular transmitter must be tested in a stand-alone configuration, i.e., the module must not be inside another device during testing.

Cirronet's HSW-DNT900 Module was tested in a stand-along configuration using a support PC board.

6. The modular transmitter must be labeled with its own FCC ID number.

Cirronet's HSW-DNT900 Module is design as an OEM module. The HSW-DNT900 Module will be labeled and instructions given to the OEM customer for FCC label requirements.

7. The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter.

Cirronet's HSW-DNT900 Module meets the specific requirements of FCC Part 15.247.

8. The modular transmitter must comply with any applicable RF exposure requirements.

Cirronet's HSW-DNT900 Module meets the specific requirements for the FCC MPE RF Exposure. Applicable warnings for RF Exposure are included in the Integration Guide for the DNT module.
