Re: Certification for Genesis VP Directional Traffic Safety Radar, Model CR-1KD
FCC ID: HTRCR-1KD

Please find the enclosed application materials for Certification under Part 15 for Genesis VP Directional Traffic Safety Radar, Model CR-1KD. The device has been tested and meets Part 15 requirements. The transitional provisions of Section 15.37 are not required.

Decatur Electronics, Inc. has previously been granted a FCC manufacturer code of 2R4 and a applicant/grantee code of HTR.

Pursuant to 47 CFR 0.459 we request that portions of the subject application be held confidential.

The items to be held confidential are

- (1) Exhibit F Schematic Diagrams

The market for this device is a very competitive one, with a small profit margin. Decatur Electronics has spent appreciable time and finances in developing this product, and having the subject information available to "competitors" will negate the advantage we have achieved in developing this product. It will create financial hardships for our company if we do not protect our design.

If there are any questions regarding this request please contact me at the address below or call (217)-428-4315. Decatur Electronics looks forward to receiving FCC approval on this device.

Cordially,

Todd Cottle
Design Engineer
