

Federal Communications Commission  
Authorization and Evaluation Division

Dear Examiner:

Subject: Declaration of compliance

We will do the following in order to allow the product on the mass-production process to comply with the EMI test report:

1. Metal shield sheet is put under PCBA. PCBA and metal shield sheet are connected with the copper tape.
2. A ferrite core is added to the I/F cable (USB). "F6RH6.4 × 10 × 3.2" is made by FERRICO ELECTRONICS (PAN YU) Co., LTD. in China.

If we may be of any further assistance, please contact us.

Sincerely yours,

Takashi Namura  
General Manager of Product Development Dept.
